CABINET DEALZ • PARTNER PROGRAM

Benefits of Being a Cabinet Dealz Affiliate

Run your own cabinet business on our platform — trade pricing through the buying group, a professional 2D kitchen design tool, and your own branded storefront. One annual membership.

Annual Membership — $1,195 / year

What Cabinet Dealz Is

Cabinet Dealz is a trade platform for cabinet professionals. Instead of negotiating with multiple suppliers, you work from one unified catalog, price jobs instantly at member rates, design kitchens in 2D, and submit orders — all in one place.

The catalog is organized the way customers actually shop: **door style first**. A buyer picks a look they love, then sees the cabinets offered in that style with live pricing. Behind the scenes, Cabinet Dealz aggregates supply across a network of vetted manufacturers and distributors, and presents it under a single, clean, trade-only brand — no competing supplier names in front of your customers. The catalog currently spans **more than 60 active door styles** across a full range of base, wall, and tall cabinets.

What It Means to Be an Affiliate

Becoming an affiliate makes you a member of the Cabinet Dealz buying group. You are an independent business owner using our infrastructure to sell, design, and fulfill kitchen cabinet projects. Your membership bundles three things that normally cost thousands to assemble on your own:

	Your Own Website	Buying-Group Access

Kitchen Design Software

Full access to the 2D kitchen designer — lay out rooms, drop cabinets, and price jobs instantly.

A white-labeled storefront with your branding, featured door styles, and your referral link.

Join the purchasing group and order at trade pricing across our supply network.

> **Membership at a glance.** The affiliate membership is **$1,195 per year**. When you join, an invoice is generated; you can pay by credit card or, where enabled, online checkout. Your membership activates for a full year and renewals stack on top of any remaining time, so renewing early never costs you days.

Co-op / Buying-Group Purchasing — What It Means

The single biggest advantage of membership is **collective buying power**. On your own, a small shop buys at small-shop prices. As part of the Cabinet Dealz buying group, your orders are pooled with the volume of the entire network, so you order at **trade pricing** you could not command alone.

- **One catalog, many suppliers.** You shop a unified product line; we handle which supplier actually fulfills each item.
- **Tiered pricing built in.** Pricing is structured for the trade (wholesale / contractor levels), and you set your own customer-facing markup on top.
- **You control your margin.** Apply a custom percentage markup per door style, or leave it blank to use the platform default. Your customers see *your* prices, never the underlying cost.
- **No inventory risk.** You sell and design; orders are submitted through the platform to the supply network — you are not carrying warehouse stock.

Your White-Label Storefront & the Four Templates

Every affiliate gets a branded storefront — your logo, your colors, your featured door styles, and your referral link — with no Cabinet Dealz or supplier names competing for attention. Choose from four professionally designed templates and switch any time from your dashboard:

Template	Look & feel
Classic	Navy split hero with a lifestyle photo and a serif headline — polished and traditional.

Showcase	Full-bleed kitchen photo with an overlaid headline and call-to-action buttons — bold and visual.
Minimal	Light, airy layout with thin rules and generous whitespace — clean and modern.
Craftsman	Warm, bold typography on an accent block — strong branding with no photo required.

Built-In CRM & Lead Management

Affiliate membership includes a customer-relationship workspace so leads never fall through the cracks. Track every prospect through your pipeline, log calls and notes, attach the customer's kitchen design to the deal, and move it from first contact to a won sale. Bookings from the design tool — including professional design consultations — flow straight into your board as new deals.

How to Use the Kitchen Design Tool

The 2D Kitchen Designer is the heart of the platform. It lets you (or your customer) lay out a real kitchen to scale, apply a door style, and see live trade-based pricing as you build. Here is the workflow end to end.

1. **Set up the room.** Type exact dimensions in feet and inches, choose a room preset, or drag on the canvas to draw the room outline. The plan redraws to scale with foot rulers so everything stays proportional.
2. **Pick the active wall.** Highlight a wall (Top / Bottom / Left / Right). New cabinets and openings march neatly along the wall you select, snapping flush and edge-to-edge so the run lines up automatically.
3. **Drop in cabinets & appliances.** Place items from the palette — Base, Wall, and Tall cabinets, plus appliances (range, refrigerator, dishwasher, sink, hood, over-range microwave). Base cabinets sit on the floor and wall cabinets mount at the correct standard height. Corner cabinets render as an L-shape, and blind corners auto-include the required filler.
4. **Choose the door style.** Select a door style and the placed cabinets re-skin instantly to that look and finish color — shaker, raised panel, slab, beaded, inset, and more — so the whole kitchen previews in the chosen style.
5. **Refine the details.** Move, rotate, and resize items; tweak dimensions; drop islands to the floor; and add finishing touches like crown molding, fillers, and toe kicks. Add doors and windows as adjustable wall openings. A tape-measure tool shows the exact gap between any two objects.

6. **Switch views.** Toggle between Bird's-Eye, Front Elevation, and Split view. The elevation view draws each cabinet's actual door-style front, so customers see what the finished wall will look like.
7. **See live pricing.** A running bill of materials prices every cabinet, filler, molding, toe kick, and countertop line as you design — with your member pricing and markup applied — so the quote is always current.
8. **Get a countertop quote.** Add a countertop with your chosen material plus sink and faucet selections to fold surfaces into the same quote.
9. **Save, share, and export.** Save the design to the customer's record, export an itemized Build Sheet (CSV), or print a graph-paper worksheet. Need help? Use the AI design consultant for layout suggestions.

Get a Professional Designer (and share the screen live)

If a customer wants expert help, they click **"Get a Professional Designer"** right inside the design tool, pick an open time slot based on your designers' availability, and book it. The booking lands in the CRM as a new deal with the design attached. During the session, the designer can paste a video/phone link for voice and generate a **read-only "share live" link** — the customer opens it and watches the kitchen layout update in near real time as the designer works. No software to install.

How to Get Started

Step	What happens
1. Apply & join	Sign up as an affiliate and receive your $1,195 annual membership invoice.
2. Pay the invoice	Pay by credit card (or online checkout where enabled); membership activates for one year.
3. Brand your store	Pick one of the four templates, add your logo, colors, and featured door styles.
4. Set your pricing	Apply your markup per door style — or use the default — so customers see your prices.
5. Sell & design	Design kitchens, manage leads in the CRM, and submit orders at trade pricing.

> **Bottom line.** For one annual membership of **$1,195**, you get the buying power of the whole network, professional design software, a branded website, and a CRM to run your pipeline — the toolkit to operate a full cabinet business without the overhead of building it yourself.
